C. Discussion

Councilmember Marshall presented a PowerPoint presentation of a fixed base rate structure with a consumption charge. Resident's consumption would be based on a four month average while commercial would be based on actual consumption each month. Commercial accounts would have the option of having a wastewater flow meter installed which would be charged at 125% of the water meter rate. Questions were asked. The mayor presented a slightly different alternative approach that would charge a fixed base rate that was determined by meter size. The need to count students, hotel/motel/RV residents would be removed from this structure.
